Technical Regulation of the Internet
From Standardization to behavorial and societal Norms

Paris, March 31st 2009

_____

Introduction: **Paul David**, Stanford Institute for Economic Policy Research.

_____

Session 1: Development of the technical standards

Increasing multiplicity of the fields, places and actors of standardization

According to the various layers of the Internet // various operating processes in self-egulated bodies or formal authorities.

Standards ex ante and ex post: which(s) competition(s)? which complementarities?

Daniel Dardailler, W3C Associate Chair for Europe & Director of International Relations.

Jean-Pierre Henninot, French Ministry Finances & Industry, Vice-Chairman ETSI Board.

Kai Jacobs, Computer Science Department, Aachen University.

_____

_____

Session 2: Technical norms or market norms?

Industrial convergence and the concept of interworking

Two poles: safety-stability/innovation-diversity

Effectivity vs effectiveness: motivations, justifications, conventions

Louis Pouzin, Eurolinc.

François-Xavier Dudouet, CNRS–Paris Dauphine University & X.

Jean-Michel Dalle, Pierre et Marie Curie University.

Georg C. T. Greve, Free Software European Foundation .

_____

Session 3: Conflicts of normativity in Internet Standardization

Technics vs Law

Market vs Ethics of responsibility

Standardization vs socialization

Richard Delmas, E.C-DG-INFSO–European Neighbourhood Policy-Union pour la Méditerranée

Yves Poullet & Antoinette Rouvroy, CRID – FUNDP, Namur.

Jean-Christophe Graz, Institute of Political International Studies, University of Lausanne.

_____

Concluding remarks

With **Philippe Lucas**, VP International Standardization & Industrial Relationships, France Telecom.
